HENDERSON

Simultaneous Action Kit for wooden bi-parting doors using a Pocket Door hardware system

Overview

For a maximum door weight of 120kg, this Simultaneous Action Kit has been designed for wooden bi-parting doors using a Pocket Door hardware system. The kit can be installed onto new systems or retrofitted onto an existing installation. Featuring a polypropylene coated cable for quiet operation the kit comes complete with pulley wheels, door brackets, cable and tension spring.

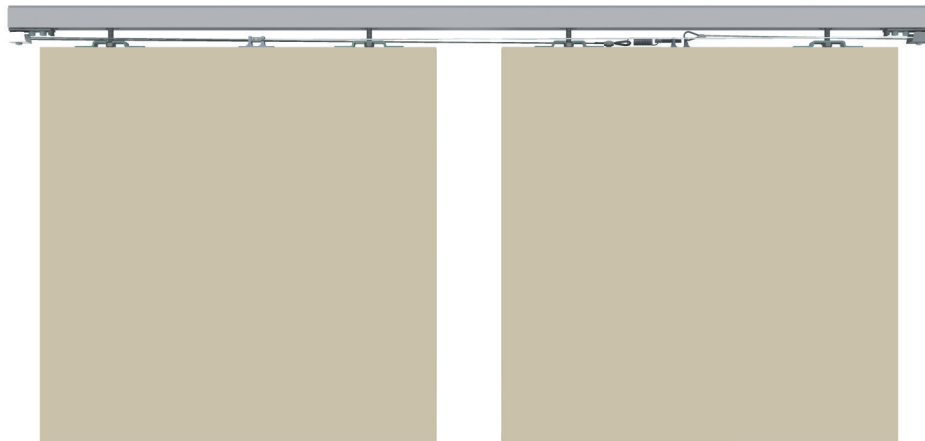

Features and Benefits

- Pull one door and the other will open/close simultaneously
- Designed to be used in conjunction with a Pocket Door hardware system
- For bi-parting, internal, wooden doors
- Can be retrofitted to existing installations
- Polypropylene coated cable for quiet operation
- Spring tension provides smooth operation
- Pulley wheels complete with bearings to provide reliable operation
